

Techniques and tools for measuring energy efficiency of scientific software applications

short description. what and why

overview of energy model
(picture where and how is
energy consumed on HPC)

explanation

description of tools and
techniques used.
advantages and disadvantages
of each.

- external physical devices
- onchip measurements
- software-base

B. ARM vs Intel
physical measurements
(ask to redo in Aalto)

A. ARM vs Intel
onchip measurements
(RAPL and TI231)

finish this week if possible

logos and that stuff
